rotring
the write way

For over 70 years rotring writing and drawing instruments have been found wherever individuals understand the power of their thoughts and visions and seek the means to express them.

This attitude to life, where what you do matters more than what you say, is an integral part of the development of every rotring writing instrument. Since 1928 we have taken the lead in meeting people's writing and drawing needs, giving rise to a product range that offers the optimum writing instrument for every requirement.

Perfection of technology, ergonomics and design sets rotring writing instruments apart.

Each one is a small masterpiece.

Each one brings thoughts and visions to life.

Each one is a symbol of quality, independence and creativity.

Overview 30

Free Ink is efficient but it's also carefree, even fun to use.

The new rotring Free Ink "Jumping Dolphin" logo symbolises all this – a blend of intelligence and play.

Free ink.

The intelligent solution

Free Ink technology is a perfect example of rotring's innovative force. Our Free Ink writing instruments have clear advantages.

The ink feed module gives a free, yet controlled flow of ink from the reservoir onto the paper, eliminating the need for a conventional ink tampon storage.

This makes it possible to use 100% of the ink contents, down to the last drop.

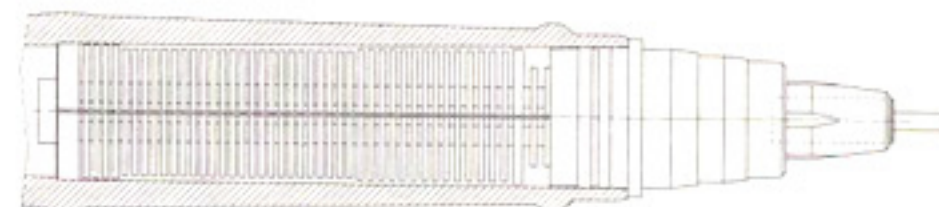

The wide range of different point styles means that we have the right pen for every application.

Whether for writing, drawing, marking, visualising or lettering, with rotring Free Ink you always have what you need.

Free Ink in comparison

Tampon storage system: Line and thus writing quality declines as ink is used up

Free Ink: Constant high line quality through the life of the pen

The ink feed module has some 40 tiny capillary chambers that maintain a constant microclimate.

This allows ink to flow smoothly right to the last drop.

rotring pencils

From pencil to hightech device

With a rotring fine-lead mechanical pencil nothing can stand in your way. Each one of them is a miniature marvel of engineering that gives you perfection and convenience in writing or drawing use.

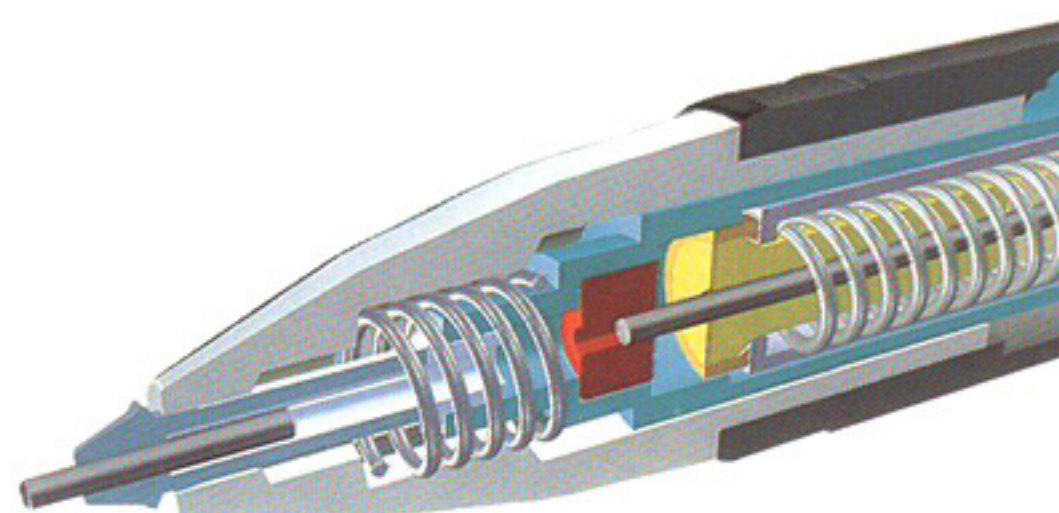

For example, the innovative precision mechanism of the rapid XL lets you use the lead all the way to the last crumb.

And when you reach that last crumb, the rapid XL automatically loads the next lead.

You won't even notice the transition!

We work out the ergonomics of our writing instruments down to the details. For instance, the wave grip area of the Tikky II gives a sure grip, while the softgrip of the rotring rapid enables untiring writing for hours.

Whether for writing, sketching, drawing or stencilling, rotring always has the right writing or drawing instrument in outstanding quality at a fair price.

The rapid XL uses the entire lead down to the last crumb.

rotring VISUPOINT

High writing quality for everyday use – at a convincingly economical price. With its Free Ink technology, the rotring Visupoint guarantees a constantly high level of performance to the very last jot. The stable rollerpoint tip writes smoothly and effortlessly, giving an unimpeded view especially in pre-printed writing areas. The rotring Visupoint is the ideal pen for everyday use in the office. The barrel and ventilated cap are made of polypropylene. The ink level window shows how much ink is left in the pen.

rotring XONOX Graphic

With its broad selection of line widths and its non-fading and waterproof pigmented ink, the XONOX Graphic is the specialist pen for extra-fine and accurate writing, sketching and drawing. The metallic fibre-tip offers an unimpeded view of the page and enables accurate work with straight-edges and even with templates. Free Ink technology ensures that the ink is spread with an even brightness and the ink level is visible at all times.

rotring XONOX Marker Multiboard

The XONOX Marker Multiboard has many convincing advantages. A valve protects the large 6 ml ink supply from drying out. Free Ink technology allows the ink supply to be controlled at all times. It's possible to reactivate a dry tip even after several hours. Ideal for presentations, seminars and training sessions. With its alcohol-based ink, the XONOX Marker Multiboard will write on flip charts, whiteboards and overheads. The writing can be easily wiped off whiteboards with a dry cloth.

rotring 600

The rotring 600 mechanical pencils are the ideal tools for writing, drawing and sketching. With their classic hexagonal design and knurled grip, these are pencils to show off your technical expertise. Other features include a lead hardness grade indicator and fixed protector sleeve.

These pencils are made of matt chrome-plated solid metal and come in black or silver.

rotring 300 mechanical pencils and clutch pencils

These writing and drawing instruments have the same features and design as the rotring 600 but in a more economical plastic finish. The rotring 300 clutch pencil is a "refillable" pencil for 2 mm lead refills.

rotring VISUPENCIL

The mechanical pencil with overload protection. When the writing pressure gets too high, the force is cushioned by a spring mechanism to keep the lead from breaking, making the pencil safer and more pleasant to use. Beneath the pushbutton cap is a long-life maxi-eraser. The cap and clip are made of non-tarnishing stainless steel. The VISUPENCIL is an especially economical mechanical pencil that is ideal for rough day-to-day use in school, office or workshop.

rotring rapid

The mechanical pencil with the ergonomic soft grip for effortless writing and drawing and a fully retractable double-push mechanism to protect your pockets. A professional maxi-eraser with lipstick mechanism is built into the pushbutton. The ideal mechanical pencil for discerning people who undertake many writing and drawing tasks.

rotring erasers

The refillable Tikky pencil erasers with pushbutton and clip turn erasing into a pleasure. They can be relied upon to remove pencil and coloured pencil lines without a trace. By using dirt-catching additives and avoiding hard abrasives, they make sure that the media surface always remains clean.

rotring fine leads

High-polymer fine leads from rotring are a solid foundation for you to build on. Their extra-strong formula turns your mechanical pencil into something more than just a refillable pencil.

The rotring multipens

All rotring multipens contain three or four writing instruments housed in a single compact instrument. "Eye contact" point selection allows you to activate the tip you want to use. Just look, select and write.

rotring quattro-pen data

Modern media require modern writing instruments. To meet this challenge that rotring has produced its new quattro-pen data. Its data input tip can be used on all touch-screen and pen-operated PCs and message pads. It also incorporates a black ballpoint, lead pencil and special fluorescent highlighter for efficient, flexible use in any writing situation.

rotring Jazz

The capless rotring Jazz is an ideal ensemble with the swinging sensation of a rollerball and the practicality of a ballpoint. It is also absolutely reliable: It can lie around for a year with the tip exposed and will still not dry out! Its triple retraction mechanism protects your clothes. Jazz pens also come in "changing colours", a special enamel that changes colours depending on the direction of the light.

Writing instruments from rotring are for people who like to take active control of their lives. They offer innovative technology, superb functionality and high aesthetic appeal. And they've been doing so for seventy years.

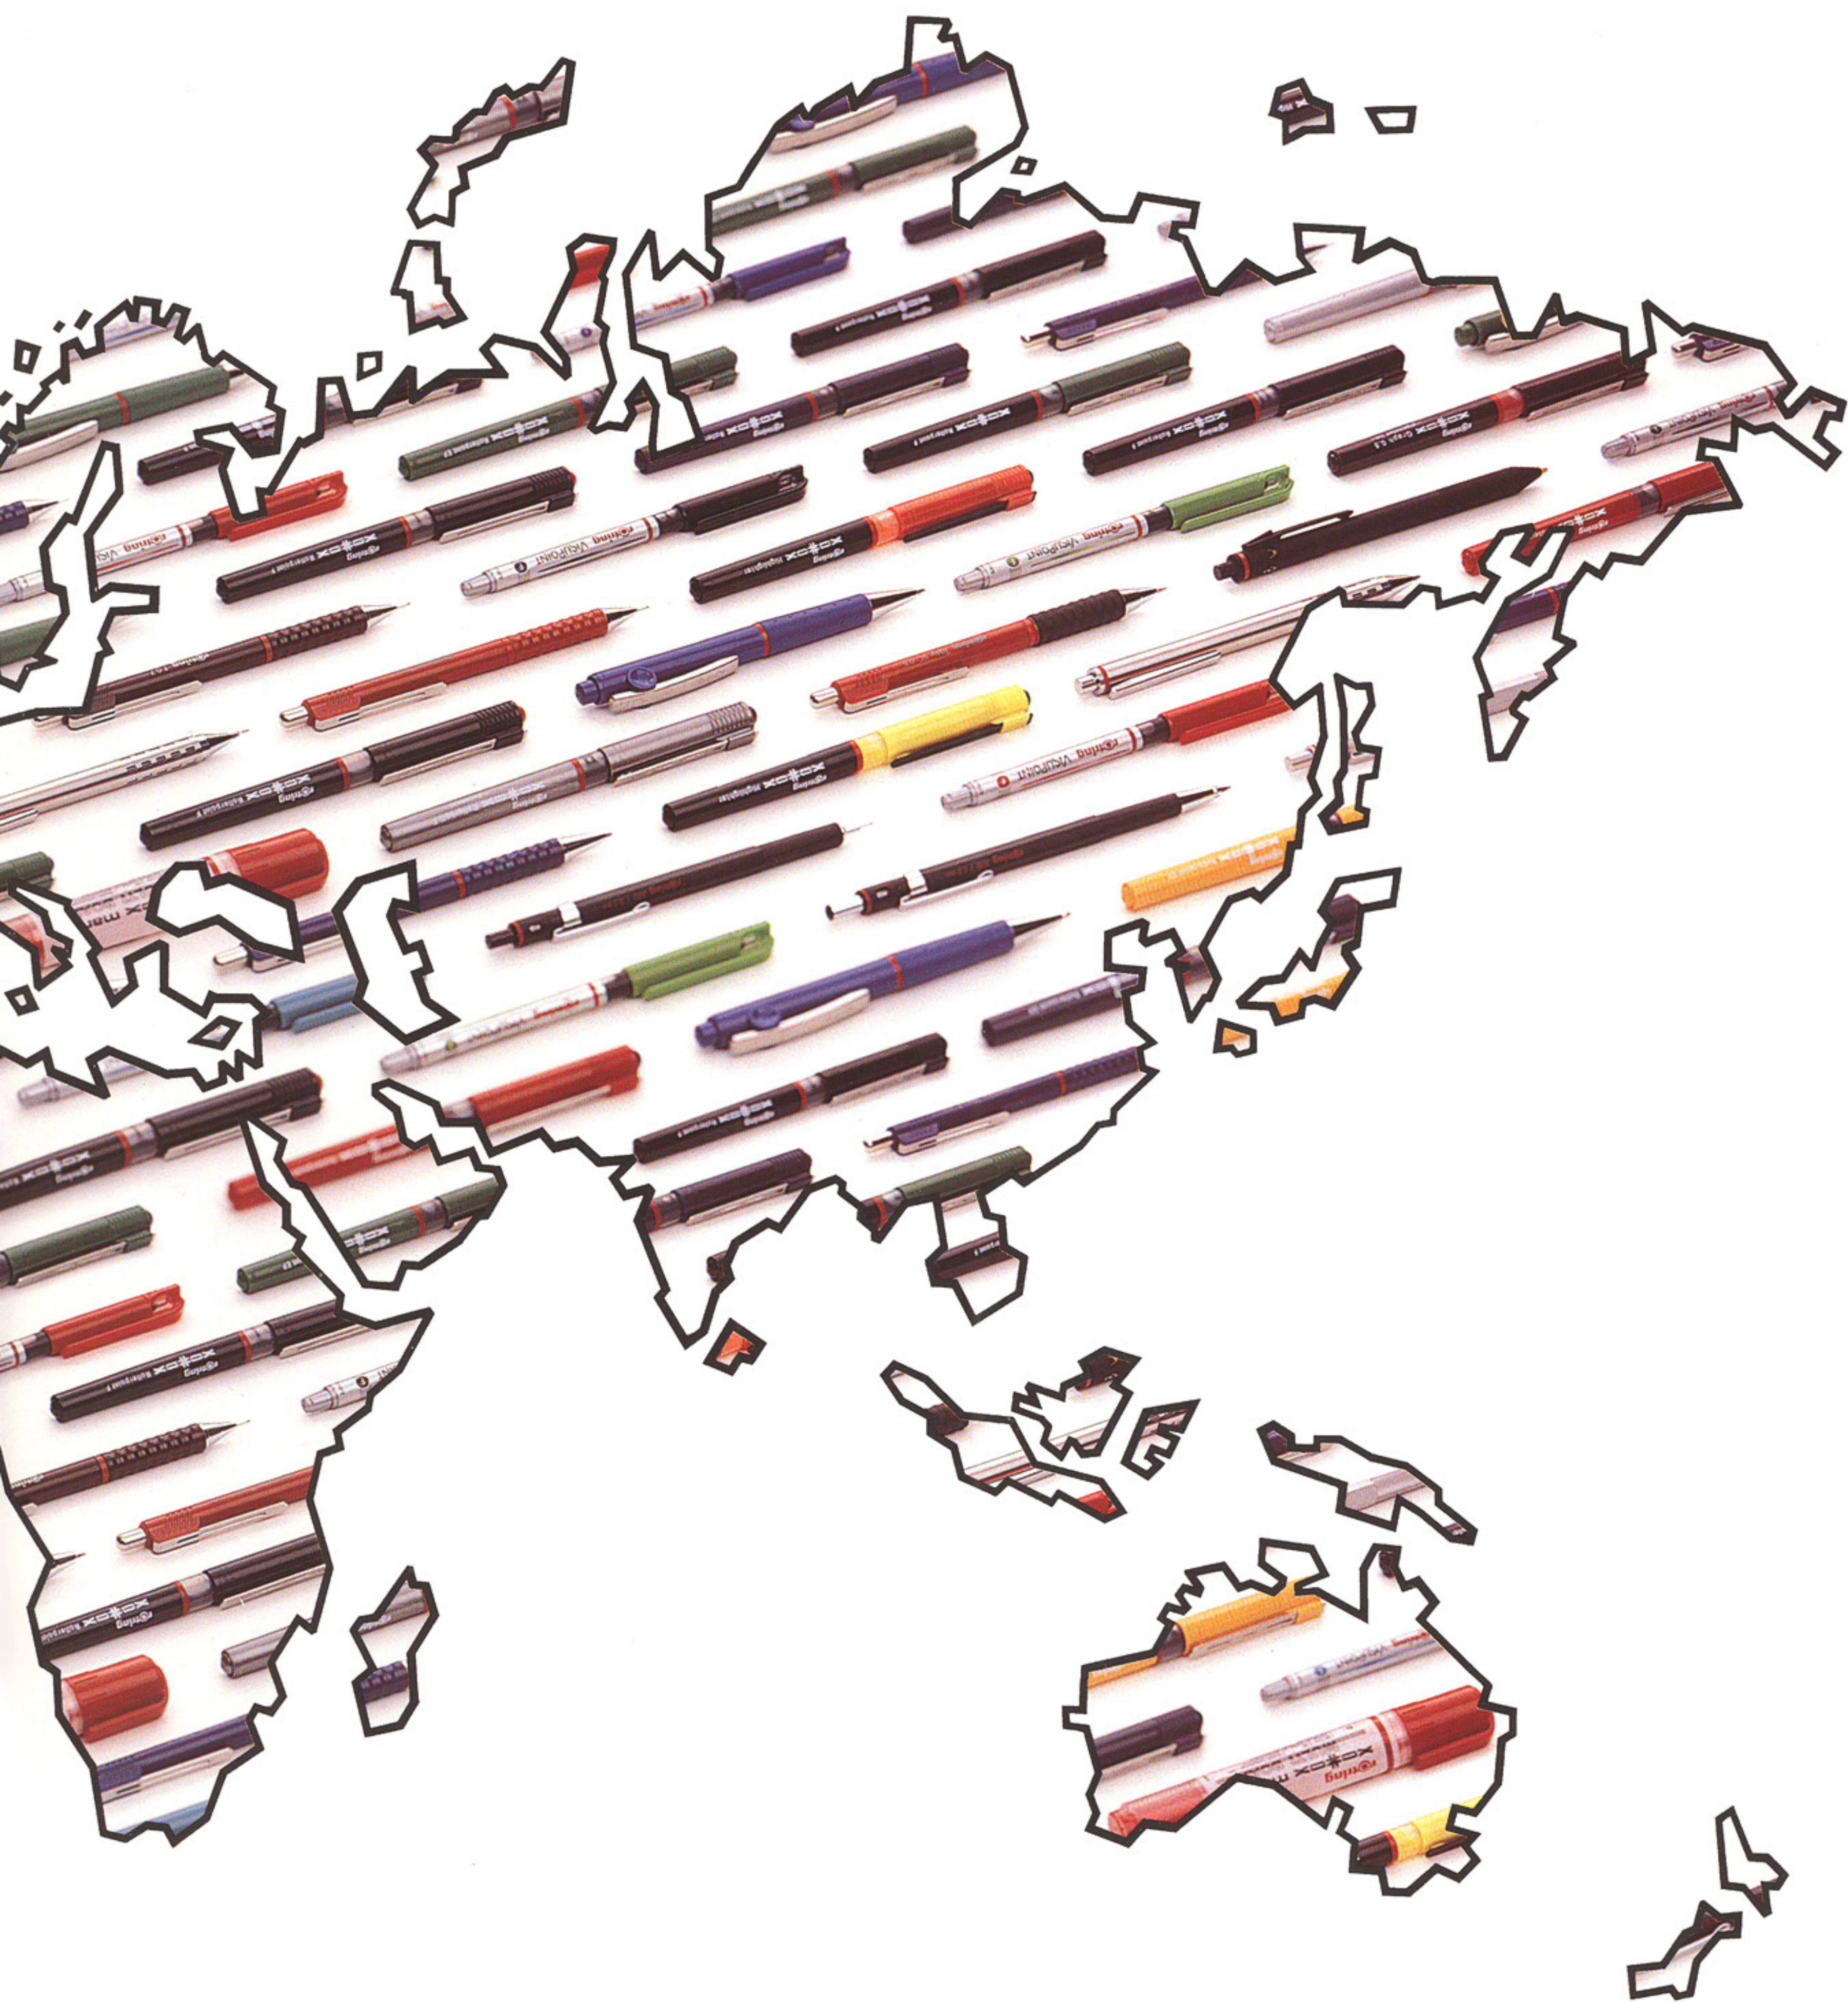

- 1928** rotring develops the "Tintenkuli", the ball-point pen with robust tubular tip that made it possible to write without a scratchy nib.
- 1936** For the first time the multi-colour pen – the forerunner of all multipens – offers a pencil and two colour pens in a single case.
- 1953** The rotring rapidograph technical pen makes its appearance. Even today it continues to set standards in mechanical drawing.
- 1955** Further proof of rotring's claims to innovation and quality: The first refillable rollerball has a genuine ruby tip and conveys a unique writing sensation.
- 1979** The rotring Tikky mechanical pencil introduces the quality, performance and precision of technical writing instruments into everyday life.
- 1984** rotring's Art-Pen, the calligraphic fountain pen originally conceived for artists, excites many connoisseurs of fine writing.
- 1988** Customers are involved in the development of rotring's new multipens. The result: a convenient "eye contact" selection mechanism.
- 1989** The hexagonal rotring Newton sets new aesthetic standards for upscale writing instruments.
- 1994** The rotring Millennium Series is launched. A new collector's item will appear each year until the turn of the millennium.
- 1995** Introduction of the first XONOX office pen – the rollerball with Free Ink technology.
- 1996** rotring focuses on three target markets: home, school and office. Introduction of the rotring XONOX Range with rollerball, fibretip and highlighter.
- 1998** The rotring 1928 – a reminiscence of the legendary "Tintenkuli" – is issued to mark the company's 70th anniversary. The rotring Visupoint – an office pen with efficient Free Ink technology – is launched in the office sector.
